

Biophilia Collection Ross Lovegrove

Biophilia collection explores a new design language that forms a dialogue between time, form, and space combining the pioneering organic design of Sagrada Familia by Antonio Gaudi, Vondom expertise in advanced roto-moulded technology and my studios ongoing research into transference of digital process into contemporary design. Biophilia is a collection, acknowledging this lineage but pushes boundaries between material structure and form into a new modern territory as yet unseen, parametrically conceived and diametrically opposed to modernism in its expression.

materials:
polypropylene

features:
Basic, Lacquered, White Light, RGB Leds, RGB Led DMX, RGB Led Battery
