

Bone Collection Ludovica + Roberto Palomba

Bones is the new and elegant collection of flowerpots. Its generous volume is alleviated for a subtle edge that makes it light. Bones is reversible; it is to say can be planted with the wide part or to use that part as base whenever the greater stability to be needed or by aesthetics. Bone has an invisible internal structure that provides the necessary strength, transmitting the weight from the base to the base of the flowerpot for added support for any plant or tree.

materials:

Basic, Self-Watering, Lacquered, White Light, RGB Led, RGB Led DMX, RGB Led Battery
