

## sesann gianfranco frattini

Respecting the thought of Gianfranco Frattini, the new edition of the Sesann keeps the spirit of the product intact. Characterized by a fabric or leather upholstery, Sesann owes its typical soft and enveloping form to the cold foam structure, encircled with an architectural tubular steel (chrome or painted), with feet in ash wood.

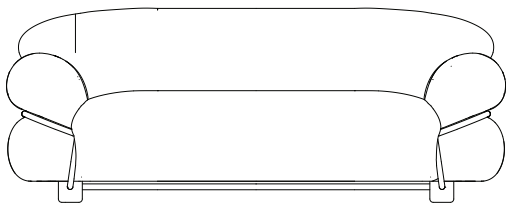

The Particular configuration of the Sesann- both formal and functional- constitutes the basis for a system of products characterized by the same structural elements, but declined in unique and fascinating objects. This approach of synthesis and reduction, proposed by Frattini, produces a formally elegant design, conceptually elaborated and, above all, unique.
