

n7 norayr khachatryan

N7 is mainly referring to military aeronautical iconography. The complexity of the structure, its angular forms, its volumetric details are resulting from a challenging construction with big relevance to a specific material (aluminium plate) and the folding technique. This is not a design for the military aims, but a design inspired by military language, extremely functional: the form of each detail is relevant to its function.

materials:

Aluminium

dimensions:

94.48" x 33.85" x 29.5"h

colors:

Black, white, and red
