

chariot gamfratesi

Chariot is a mobile table consisting of three simple elements joined together: wheels, trays and structure. The wheels, which in common carts are usually small, are brought to the extreme size, becoming the iconic element of the project.

The rubber profile is inserted into the wheels for easy movement; the two trays act as storage compartments, the metal structure is also a handle: slightly raising the cart, it can be moved.

materials:

Structure: painted metal

Trays and wheels: lacquered mdf or natural solid oak

colors: fluorescent red, white, natural oak

dimensions:

W. 22" x D. 29 - 1/8" x H. 23 5/8"
