

poppins barber osgerby

There are many umbrella stands but the archetype is designed for traditional long umbrellas with a hooked handles. Our intention was to create a three dimensional graphic piece that worked perfectly for both long and compact umbrellas. The triangular shape was chosen as it fits well in any position in a room, including a corner, and it lets them tessellate beautifully. A simple series of holes enables furled or unfurled umbrellas of any size to be popped in without a problem. Poppins feels at the same time both serious and playful, the glossy plastic emphasizes its water proof qualities, but the form reminds us of a game; Billiards or perhaps Snooker triangle.
