

bek table giulio lacchetti

The perfect table for a bar or cafe with a strong graphic character. Its simplicity conceals a modular and versatile soul. By adding a simple metal element to the iconic support the table can be raised from 75cm/29.5" to 110cm/43.3". The characteristic of this table is concentrated in its leg, composed of two identical metal elements: the combination of these two halves creates a unique object, perfectly adapted to be mounted between the table and its base.

materials:

Support and base in powder-coated metal for outdoor use; top in laminate, HPL or lacquered MDF.
