

jian neri & hu

The Jian collection for Gandia Blasco is a collection of outdoor furniture inspired by the concept of “in-between”. The character Jian in Chinese has the meaning of “in-between”, and is one of two characters that form the words “space, time and people”, among many others. We wanted to create a collection that has an ethereal quality, capturing both time and space, the sky and land, something to give poetry to outdoor living, and offer a restful sanctuary to everyday busyness. The collection is made up of various sizes and functions for different outdoor purposes.
