

mem christophe pillet

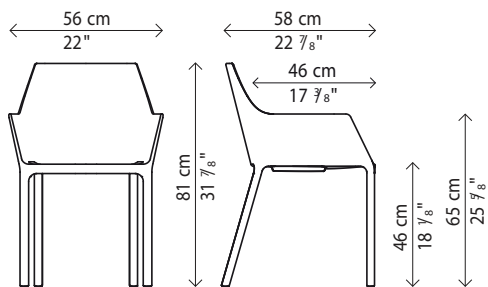

A contemporary chair, with a name inspired by an ancestral sound: Mem, which means, “water” in the ancient Egyptian language. Made of injection-molded polypropylene reinforced with glass, it is highly resistant and elegant, with its skillfully designed corners and curves. The chair also has two holes that make it stackable while retaining its entirely all-embracing shape: a valuable advantage also in contract or outdoor environments. Removable seat cushion available.

materials:

injection-molded polypropylene reinforced with glass in white, black, beige, red coral or brown. seat cushion in polyurethane in the same colors.

dimensions:

removable cushion
