

tide zaha hadid

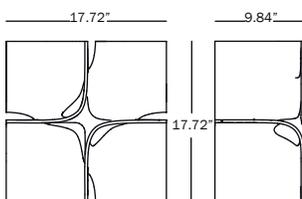

The design of Tide bookcase is a study in geometry and mathematics, and defines optimal shapes and forms, created to offer the greatest possible surface area from all sides. The result is a system of modular elements with the scope to form innumerable different compositions, from the very small to the large or even enormous. It is made of glossy moulded ABS, in three universal colours – white, red and black – that can be freely mixed and matched. Tide can create the widest range of shelving solutions for books or for any other requirements involving the display and organization of objects, in domestic spaces, showrooms or commercial settings alike.

Materials

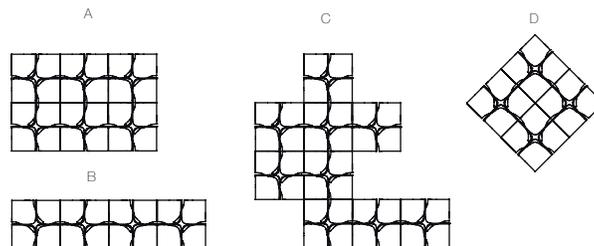

Standard injection-moulded glossy ABS. Color options:
